

## Coronavirus Outbreak Update

January 23, 2020 - Recently the outbreak of a new type of coronavirus has been reported in the Wuhan area of China. China's most reputable virologist has stated that this new virus is not as virulent as the previously reported SARS virus in 2003. We are closely monitoring the epidemic developments and extend our sincere wishes to all patients for a quick recovery.

Due to the start of the Chinese New Year holiday period on January 25, 2020, there will be only minimal operations at our various companies in China during the holiday period. Therefore, we do not foresee any financial impact on our consolidated companies' results for January 2020 related to the outbreak of this virus.
